

QUIRKWIRECO.

High Temperature Wire & Cable

Quirk Wire Co. routinely communicates with its raw material suppliers to ensure conformity with the European Union's Registration, Evaluation, Authorizations and Restriction of Chemicals (REACH) 253 (EC) regulation No. 1907/2006. REACH is a regulation of the European Union, adopted to mitigate the risks posed by chemicals and to improve the protection of the environment and of human health.

Quirk Wire Co. is committed to complying with the REACH regulation and confirms none of the 78 restricted (Annex XVII) materials or the 253 Substances of Very High Concern (SVHC), are found in quantities greater than the 0.1% threshold by weight in any of the raw materials used in the manufacture of our high temperature wire and cable products. This is confirmed as of the last date of publication by the European Chemicals Agency (ECHA) on February 4th, 2026.

Quirk Wire will continue to stay abreast of any substances that are identified and added to the Candidate List.

If you have further questions or concerns that need to be addressed, please do not hesitate to contact us.
